**Abstract**

The topic "Jawab-Al-Talab in Arabic Language" has not been studied by ancient linguists as one style of language in a complete and independent way. It has been studied in a scattered way through other subjects, like: "Oslub-Al-Shart wa Jawabuha", this was the purpose behind choosing this topic.

The syntactic and Rhetoric books were very helpful in this study; we came into a conclusion, which we put it in its place. We tried to make this research as complete as to be a beneficial work in order to serve the language of the Holy Quran.
