**Abstract**  
**The Vision and Composition in Koliet Khouri's Narration Creativity**  
**Suha "Mohammed Hail" Musa Bazlamit**  
**Mu'tah University, 2009**

This study addressed Koliet Khouri's narration creativity, as the presented contents have been detected in her novels. The social dimension appeared in the two first novels; in which the author tackled Arab woman's concerns and worries. The woman image appeared as rejecting the authority of man and the social traditions that prevented her from practicing her freedom and choosing the life she wants. The woman in her novels is educated to different levels and is a working woman who usually works in clerical jobs or as a journalist or a University professor. Since her self-acquired awareness made her reject what has been imposed upon herself so she rebelled and went beyond it. The novelist also addressed a dialectical issue between East and West, where she was one of the few people who tackled this subject and dealt with it through a reconciled view to a certain extent. And in the Political dimension the novelist managed to express the worries of the Arab World reality which is full of variables, and expressed the difficult circumstances which the Arab person lives with. This is concerning the study of the contents aspect.

As for the study of the artistry aspect, this research addressed the time construction, where I studied the paradox between flashbacks and flash forwards. Also I studied the level of order and permanency. The place has been addressed as well in terms of open and closed places. The study revealed the scope of the relation between the place and the characters. Finally the narrative vision was studied, as the study highlighted the rhetoric formulas that were used in presenting the narrative substance. The research tackled as well the different types of narrators and their positions in the narrative.
